

Tasking Memorandum No. 99-269

Memorandum For Cdrs DCMDs, DCMC CAOs with Flight Operations

Subject: Aviation Contractor Severe Weather Plans

Date: July 27, 1999

Suspense Date: September 30, 1999

Target Audience: CAO Cdrs with Flight Ops and Government Flight Representatives (GFRs)

Requirement(s):

- Review contractor Severe Weather Plans to ensure they adequately address:
 - Weather monitoring procedures
 - Dispositioning of aircraft with impending severe weather
 - Short notice: Lightning, thunderstorms, high winds, etc.
 - Long notice: Hurricanes, blizzards, etc.
 - Aircraft Storage/Security/Evacuation procedures
 - NOTE: Funding requirements for aircraft evacuation shall be coordinated in advance with the ACO and program office.
 - Training of employees
- References:
 - DLAM 8210.1 Vol I, paragraph 3-10.d-4 (J) and paragraph 8-2.E
 - DLAM 8210.1 Vol II, paragraph 3-2.B.3-C
- Why we need to complete the required action - There have been several incidents/mishaps in FY99 which may have been prevented had contractor procedures in these areas been thoroughly reviewed and adhered to. DLAM 8210.1 requires that contractors' procedures include severe weather plans.
- These Plans will be reviewed during contractor's next cyclical Performance Based Assessment and CAO's IOA. District Chiefs of Flight Operations (CFOs) will review each plan during their next scheduled GFR management review.
